## PEOPLE MOVER

LEADING

# RANGE

## NOTHING CAN STOP YOUR WORK.

Every **DUCATO** vehicle is made to help workers get the best out of their jobs. Always overcoming every obstacle to get the job very well done. Its reliability and versatility, with over 3000 different versions, made it an undisputable market leader. But more than that, it proudly helped workers everywhere see their businesses grow and most importantly: make great things with it.

LEADING

# MOVER

WHEN THE  
JOURNEY  
OVERTAKES THE  
DESTINATION.

The **DUCATO PASSENGER** is designed to get people to their destination with the utmost comfort and performance. High-tech driver aids make every journey safe and comfortable for driver and passengers alike. While the new Euro 6d-TEMP engine delivers first-class performance with ultra-low fuel consumption.

LEADING

# STYLE

**YOUR TEAM WILL  
STAND OUT.**

The **DUCATO** is city-proof. It has innovative looks, sleek lines and a strong, dynamic character, where style meets functionality in a striking design. It only takes a glance at the bumpers, grille, headlights and body-coloured handles to see that functionality is the essence of the **DUCATO**. In fact you can customise every one of these items, to get a vehicle that's made to measure for you: because it's the details that make the difference.

LEADING

# COMFORT

**FEEL GREAT  
WITH EVERY JOB  
WELL DONE.**

The whole **DUCATO RANGE** was built to make every job pleasant, with special features designed to offer maximum comfort for workers and passengers. The tablet holder is capable of accommodating smartphones or tablets up to 10", whereas you can have a large storage compartment to accommodate whatever you want, such as laptops up to 15". The optional solex glass windscreen helps to reduce solar radiation and cab temperature, for the benefit of everyone on board. Ducato Passenger is equipped with manual or automatic climate control system, with heated seats and sprung seats guaranteeing a great day at work.

## LEADING TECHNOLOGY

### LATEST EQUIPMENT, SAME DEDICATION.

It's essential for every worker to have simple and convenient access to their instruments. All infotainment devices, safety and driving assistance systems can be accessed easily from the driver's seat. All radios are equipped with the Bluetooth® system for hands-free calls plus, on request, a DAB receiver (Digital Audio Broadcasting). The Uconnect™ Radio, with steering wheel controls, is equipped with a 5" colour touchscreen from which it is possible to manage radio stations, phone calls and SMSs, as well the display view from the rear camera. The Uconnect™ Radio is also available with a built-in satellite navigator and TomTom software complete with TMC receiver for traffic information, IQ Routes to identify the quickest route to the destination, and a database of fixed

speed cameras (in countries where provided). You can also choose the 7" Radio by MOPAR, with colour touchscreen and even more features: voice recognition, USB on the radio frame, enhanced connectivity with 7" screen thanks to Apple CarPlay support and Android Auto. The new 7" Radio provides something unique, the vehicle dimension selection: customers simply have to enter the dimensions and weight of their vehicle and the system will prevent them from taking narrow streets and low tunnels.

You can specify your **FIAT DUCATO** with a rear-view camera that films the back of the vehicle and relays the image to the in-cab display. The camera activates whenever you engage the reverse gear, allowing you to reverse in complete safety. It also helps you keep an eye on loading/unloading operations directly from the cab, because it comes on automatically when the rear doors open.

Apple CarPlay is a safer, smarter way to use your iPhone in your car. It lets you get directions, make calls, send and receive messages, and listen to music, all in a way that lets you stay focused on the road.

#### androidauto

Designed for the safest driving experience whilst staying connected, Android Auto™ delivers integrated steering wheel and voice commands.

LEADING

# POWER

## THE POWER TO GO ANYWHERE.

The **DUCATO PASSENGER** has two dynamic, fuel-efficient, low-emission diesel engines for tackling every job. The 140 Multijet<sub>2</sub> with the Manual transmission is the "core" power unit of the range, progressive in all conditions thanks to its high torque availability at low rpm and the 180 Multijet<sub>2</sub> with the Automatic "9speed" transmission, ideal for severe missions. These engines, standard equipped with Eco Pack, comply with the strictest environmental regulations, thanks to the advanced SCR system (Selective Catalytic Reduction) and feature the Variable Geometry Turbocharger. This technology ensures smoothness when on the road, increased reactivity at low speeds and generates greater performance. It also keeps fuel consumption at a minimum.

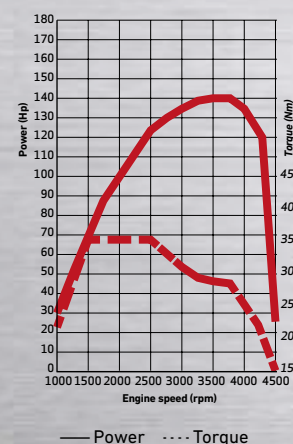

ECO BUTTON

natural  
power

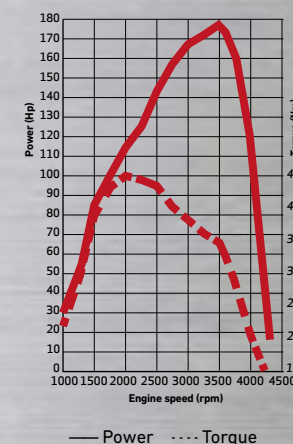

### 140 MULTIJET<sub>2</sub>

**Displacement (cm<sup>3</sup>):** 2287  
**Power:** 140 HP (103kW) @3.500 rpm  
**Torque:** 350 Nm @1.400-2.500 rpm  
**Injection:** Common Rail with variable geometry turbocharger and intercooler  
**Type:** Diesel, 4 cylinders in line  
**Emissions level:** Euro 6d-TEMP

### 180 MULTIJET<sub>2</sub> POWER

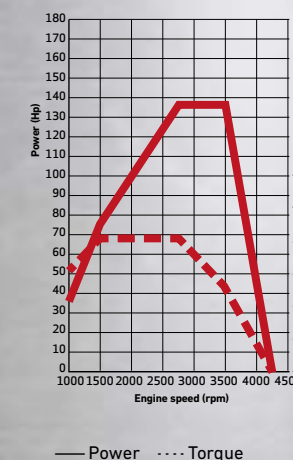

**Displacement (cm<sup>3</sup>):** 2287  
**Power:** 178 HP (130kW) @3.500 rpm  
**Torque:** 450 Nm @1.500-3.000 rpm  
**Injection:** Common Rail with variable geometry turbocharger and intercooler  
**Type:** Diesel, 4 cylinders in line  
**Emissions level:** Euro 6d-TEMP

If you're looking for a powerful vehicle that will save you money and keep you on the road even when conventionally fuelled vehicles are banned, the new Ducato Natural Power is the solution for you. Its 5 CNG tanks (with overall capacity of 220 L, equating to 36 kg) are located under the floor so they don't take any space away from your passengers, and they provide a range of 400 km on gas, after which the system switches automatically to petrol.

### 140 NATURAL POWER

**Displacement (cm<sup>3</sup>):** 2999  
**Power:** 136 HP (100kW) @3.500 rpm  
**Torque:** 350 Nm @1.500-2.700 rpm  
**Injection:** Specific CNG/Petrol injectors with variable geometry turbocharger and intercooler  
**Type:** Dual fuel system, 4 cylinders in line  
**Emissions level:** Euro VI

LEADING

# POWER

## CREATING THE CHANGE.

The all-new 9-speed automatic transmission is designed to deliver world-class driving pleasure and reliability. Now, you can keep your hands on the wheel and eyes on road ahead without having to think about constantly shifting gears. All nine gears automatically shift quickly, efficiently and smoothly thanks to a torque converter, which replaces the conventional clutch. This guarantees effortless changes between shorter gears for better reactivity, increased torque and improved fuel consumption; providing the smoothest transition from gear to gear and ensuring that the right gear is engaged at every moment — all the things you need to work better and not harder. In addition, with the new automatic transmission every customer or driver can adapt the response to the mission performed through a switch activating three different driving modes: Normal, that represents an optimal balance between performance and economy, ECO for fuel economy oriented and Power facing full-load or uphill missions.

LEADING

# SAFETY

## ALL THE PROTECTION TO KEEP UP THE GOOD WORK.

Helmets, work boots, protective glasses, gloves, hearing protection – the safety items are countless. Every worker understands the importance of security at the job. The **DUCATO RANGE**, is designed with top of the line safety features.

The **DUCATO** is built to protect all passengers being equipped with all the most advanced control and safety technology.

### TRAFFIC SIGNS RECOGNITION (TSR)

Using the on-board camera, the **TSR** assists the driver by recognising speed limit and overtaking signs and reproducing them on the on-board display.

### LOAD ADAPTIVE CONTROL

The Load Adaptive Control integrated into the **ESC** detects vehicle load conditions, such as weight and centre of gravity. When these parameters change, it calculates new settings and cut-in thresholds and sends them to the **ABS**, **ASR**, **ESC** and Rollover Mitigation functions, so as to maximise their efficiency at all times.

### ROLL OVER MITIGATION

Rollover mitigation is a new support system for the **ESC**. It prevents rollover risk situations at high speed and reduces roll when cornering at low speed.

### TRACTION +

Traction+ is the innovative traction control system that improves traction on the most challenging, low-grip surfaces. If one of the drive wheels loses traction, the control unit detects slippage, brakes the wheel and sends torque to the wheel with most grip. In this way, the vehicle's performance is more comfortable, ensuring the best stability and handling.

### TYRE PRESSURE MONITORING SYSTEM (TPMS)

Monitors tyre pressure constantly, and indicates any loss of pressure on the on-board display.

### RAIN AND DUSK SENSOR

The rain sensor switches the wipers on and adjusts their speed according to how hard it's raining. The dusk sensor automatically switches on dipped headlights when the natural light outside falls below a certain level.

### FOG LIGHTS

The optional fog lights are installed at the bottom of the front bumper for maximum efficiency and protection.

### HILL DESCENT CONTROL

Allows you to tackle downhill driving on gradients of up to 50% without using the brake pedal or accelerator, so that you can focus all your attention on the steering.

### CRUISE CONTROL AND SPEED LIMITER

Cruise Control allows you to set the cruising speed and keep it constant. The Speed limiter let you set the maximum speed that the vehicle can reach, thereby increasing safety and reducing the risk of picking up penalty points (available on 130 and 150 HP only). When the accelerator pedal is fully depressed, the driver can exceed the limit set for specific overtaking manoeuvres.

### LANE DEPARTURE WARNING SYSTEM (LDWS)

The Lane Departure Warning System can detect if your vehicle is changing lane, even in low-visibility conditions. In the event of danger, an audible and visual signal alerts the driver immediately.

### HILL HOLDER

Brakes the vehicle on hill-starts, and stops it rolling backwards without any handbrake input from the driver. It then releases the brake automatically.

### HIGH BEAM RECOGNITION

Switches automatically between dipped and full-beam headlights, thereby increasing visibility and reducing the risk of dazzle when driving at night, by recognising vehicles travelling in the opposite direction.

### ELECTRONIC STABILITY CONTROL (ESC)

The ESC cuts in automatically in emergency situations, such as if you have to swerve suddenly to avoid an obstacle. It monitors parameters such as lateral acceleration, speed, grip and steering wheel angle. It processes the data and, if necessary, modulates the torque and braking system to restore perfect stability to the vehicle.

### REAR CROSS PATH DETECTION

It helps to avoid accidents in maneuvering using the same radar sensors to detect upcoming vehicles from the side when driving in reverse.

### FULL BRAKE CONTROL

It is an integrated system designed to prevent or reduce the severity of a collision. It detects obstacles in the forward path and, once an impending collision is detected, alerts the driver and triggers autonomous emergency braking.

### BLIND SPOT ASSIST

The system uses radar sensors (installed in the rear bumper) to detect upcoming vehicles that are not visible because in the blind-spot angle of the rear-view mirrors. You are notified via au-dio warnings and illuminated icons on the side-mirrors.

LEADING

# VERSATILITY

## ADAPTABLE TO YOUR NEEDS.

Being able to adapt obstacles and the customer's needs is what makes the difference between incompetence and success on the job. That's why the **DUCATO RANGE** is built versatile like every worker, adjusting to its every need.

You'll have no trouble finding the right **DUCATO PASSENGER** for you, because there are so many different versions: **PANORAMA**, **SHUTTLE** and **COMBI**, including the **FLEX FLOOR** variant with track-mounted sliding seats so that you can arrange all your passenger space exactly as you want it.

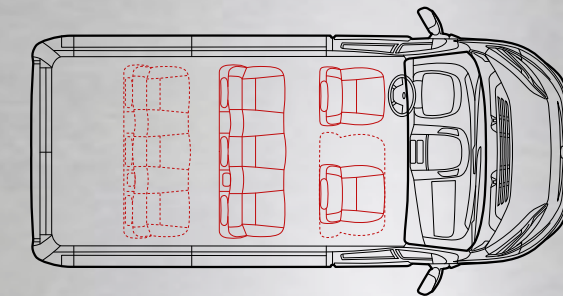

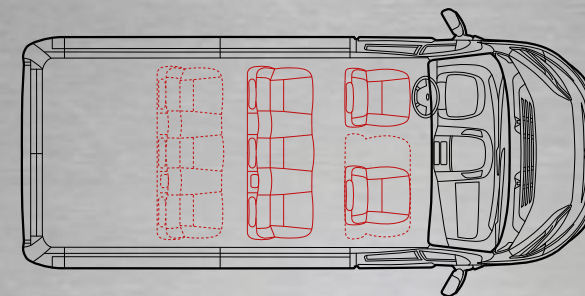

LEADING

# VERSATILITY

## COMBI.

The **DUCATO COMBI** adapts its space to your needs and is available with 2 or 3 rows of seats (fold-down and removable) for up to 9 people. You can fold down both the second and third rows of seats, to make more room for goods or passengers. What's more, the generously sized seats and individual ventilation outlets will keep your passengers comfortable however long the journey.

### VERSIONS

#### COMBI

Wheelbase 3000 mm  
3000Kg and 3300 Kg  
5/6 seats  
8/9 seats

#### COMBI HIGH

Wheelbase 3450 mm  
3300 Kg  
5/6 seats  
8/9 seats

#### COMBI HALF-PANEL

Wheelbase 3000 mm  
3000 Kg and 3300 Kg  
5/6 seats

#### COMBI HIGH HALF-PANEL

Wheelbase 3450 mm  
3300 Kg  
5/6 seats

# LEADING VERSATILITY SHUTTLE.

The legendary **DUCATO RANGE** offers a version for those who want even more space and comfort to move passengers and goods. The new **DUCATO SHUTTLE** version has the best-in-class cargo area length, with up to 9 seats. Which can also be extended with the Combi Flex Floor option.

It also has a specific version available, designed to address shuttle mission profile, such as airport, hotel, tourism, sport teams and more. Making passengers consider the ride even better than their destination.

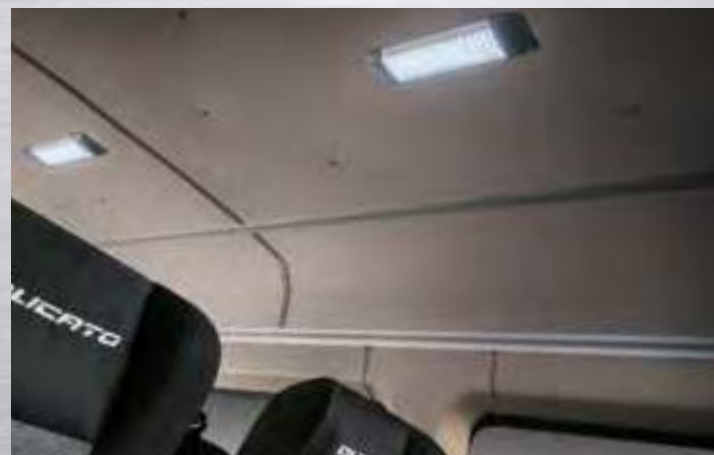

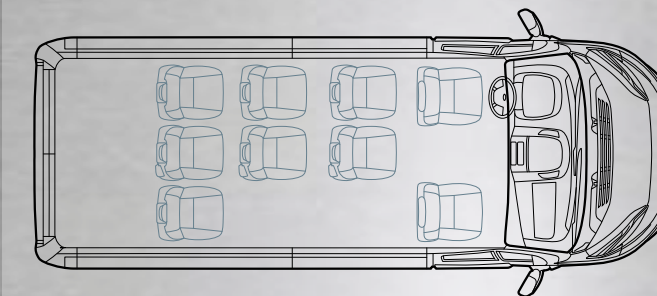

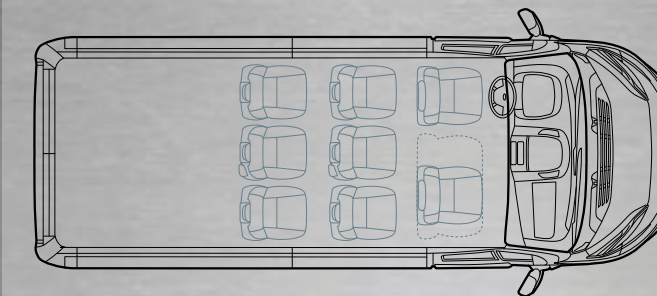

## VERSIONS

### SHUTTLE

Wheelbase 4035 mm  
3300 Kg, 3500 Kg  
Maxi 3500 Kg  
8/9 seats

### SHUTTLE FLEX FLOOR

Wheelbase 4035 mm  
3500 Kg  
9 seats

# VERSATILITY

## PANORAMA.

The **DUCATO PANORAMA** is available in 8- or 9-seat configuration, with reclining seats, armrests and individual three-point seatbelts. The interiors are finished to a high level so that everyone on-board travels in complete comfort. The luggage compartment has a sturdy load cover for concealing unattended bags. You can remove the load cover or fold it away when you need to carry extra high objects. And there are handy storage compartments for passengers to stow their belongings in during the journey. There is also an optional rear climate control system with dedicated ventilation outlets in the roof and floor.

### VERSIONS

#### PANORAMA

# VERSATILITY

## FLEX FLOOR.

The **FLEX FLOOR** is the most versatile passenger transport; with aluminium tracks in the floor, you can arrange your interior space exactly as you want it. The rear seats are all independent and fitted with 3-point seatbelts and integrated head-restraints. Thanks to special anchoring systems, you can move and position the seats as you prefer, to free up space for bulky luggage or wheelchairs.

**DUCATO FLEX FLOOR** is available on **SHUTTLE AND PANORAMA** versions.

## LEADING PERSONALITY OPTIONAL.

Practicality at work, comfortable interiors and first-class visibility from the cab: choose the Ducato options that match your needs.

### WEBASTO

Thanks to the programmable Webasto Thermo Top “C” heater, you can warm your vehicle up as much as 24 hours before you start your journey. You can use the system instantaneously too, to warm the cab and engine and de-ice the windows. The system is entirely independent of the engine. The Webasto heater is also available in an automatic version without timer.

### FOOTBOARD

The Ducato can be fitted with two automatically deploying steps, one at the rear and one at the side, for easier access to the load compartment. Both are retractable, and have a non-slip aluminium covering and a load capacity of 150 kg.

### ADJUSTABLE SUSPENSION

The adjustable air suspension keeps the vehicle's chassis geometry constant regardless of load, and enables you to lower the access threshold when you need to.

### AUTOMATIC CLIMATE CONTROL SYSTEM

Every version of the Ducato can be equipped with automatic climate control. The display in the dashboard's central console provides all the information you need and automatically controls cab temperature, air flow and distribution, compressor start-up and recirculation, according to set temperature and environmental conditions. So the temperature in the cab remains constant regardless of how much it changes outside.

### HEATED SEATS

To cope with the coldest climates, you can heat the front seats at the touch of a button, for top-level comfort and optimum battery use.

### NEW RADIO 7"

The bigger screen and enhanced connectivity allow for better performance and easier navigation while driving. Receive phone calls, read text messages and stream music with ease.

LEADING

# PERSONALITY

## OPTIONAL.

A great functional toolkit is the first and fundamental equipment of every clever hard worker. But a professional like you deserves more. That's why every detail of the New Ducato was designed to truly make a difference to your work. Proudly helping you achieve more and carry great results.

### ELECTRIC ADJUSTABLE FOLDING MIRRORS

The Ducato's double-parabola door mirrors combine a panoramic rear view with the utmost practicality, because you can adjust them and fold them away from inside the cab. Both parabolas are independently adjustable to meet the needs of every user.

### LED DRL

You can spot a Ducato at once from its LED daytime running lights. LEDs last longer than normal bulbs and reduce fuel consumption because they use less electricity.

### TINTED WINDOWS

The options list includes tinted rear windows for the privacy of your passengers and a reflective windscreen to reduce solar radiation and increase comfort in the cab.

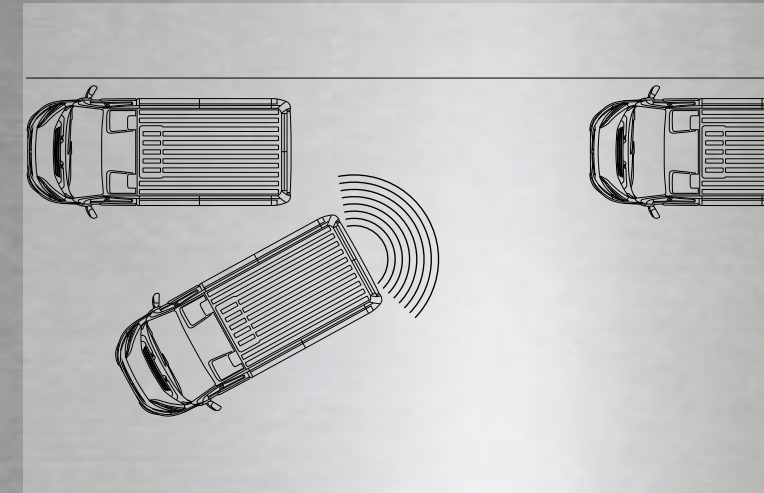

### LEATHER STERLING WHEEL AND SILVER INSTRUMENT CLUSTER

The leather steering wheel and the instrument cluster frame with silver accents guarantee to your Ducato the maximum of the elegance.

### PARKING SENSORS

The ultrasonic parking sensors activate automatically when you put the vehicle into reverse, and beep intermittently to warn you if you're approaching an obstacle.

### REAR CAMERA DISPLAY

A camera is available on Ducato to frame the area behind the vehicle and show the image on the display of the Uconnect radio on the dashboard. The camera is switched on when reverse gear is engaged to help safe manoeuvring. It can also be used to monitor loading and unloading operations directly from the cab because it is switched on automatically when the rear door are opened.
